

You look like a Pro to us.

Considering upgrading to Socrative Pro?
Here's a summary of all of the great things Socrative Pro can do.

1 MULTIPLE ACTIVITY ROOMS

Run multiple quizzes, polls, exit tickets or space races at the same time with up to 10 rooms. Use a unique room for each class or divide your class into smaller groups.

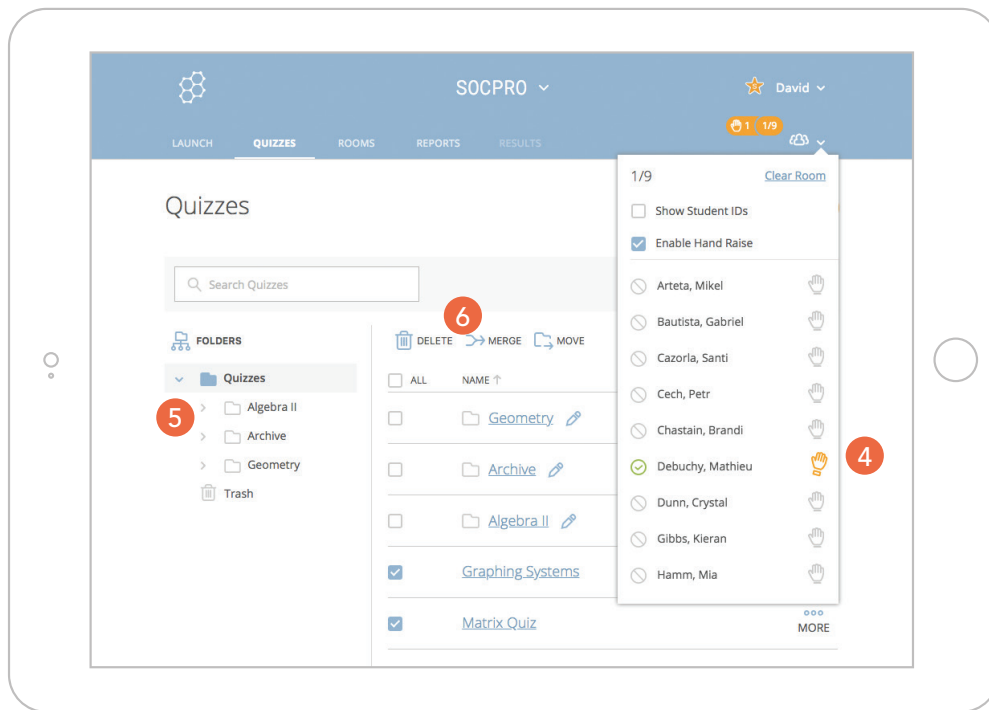

2 SHAREABLE LOGIN LINKS

Room URLs can be generated with one click, making it easy to provide students with direct access to a room.

3 ROSTER IMPORT

Easily manage who can enter your rooms by uploading class rosters straight from an Excel or CSV file. Or, enter student names manually — great for adding new students to an existing roster.

4 STUDENT HAND RAISE

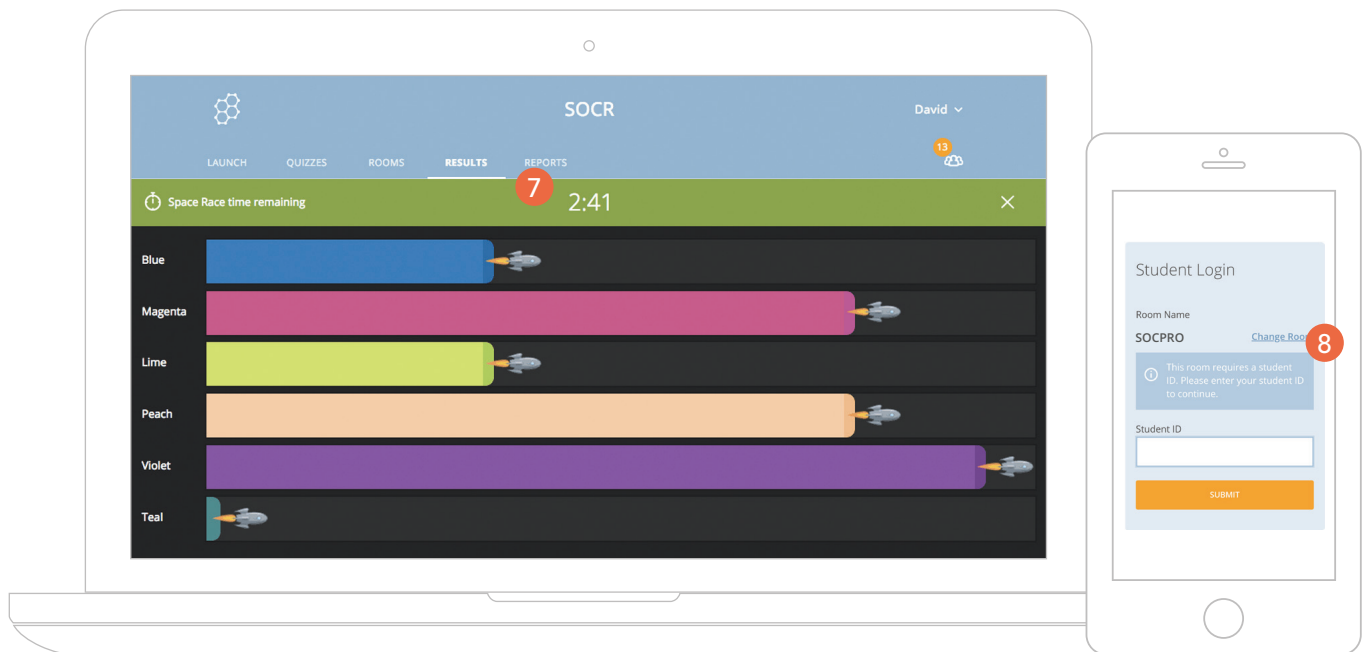

Let your students digitally raise their hand to ask questions about activities. You can also use this feature to get the attention of a single student.

5 CUSTOM FOLDERS

Create custom folders to organize your quizzes and make them easier to find. Create folders by subject, term, class, or whatever make sense for you.

6 MERGE QUIZZES

Easily combine two separate quizzes. Great for creating lengthy quizzes that exceed the 50-question limit.

7 SPACE RACE COUNTDOWN

Set a timer for a space race to automatically end the activity, freeing you up to walk around the class to answer questions and listen to student conversations.

8 PRIVATE ROOMS

Choose to make your rooms accessible to anyone (public) or accessible only to students with a unique ID via a class roster (private).
